ОТВЕТ

## SQL Statement:

```
SELECT Orders.OrderID, Employees.FirstName  
FROM Orders  
INNER JOIN Employees  
ON Orders.EmployeeID = Employees.EmployeeID  
WHERE FirstName = 'Steven';
```

Edit the SQL Statement, and click "Run SQL" to see the result.

[Run SQL »](#)

## Result:

Number of Records: 11

OrderID	FirstName
10248	Steven
10254	Steven
10269	Steven
10297	Steven
10320	Steven
10333	Steven
10358	Steven
10359	Steven
10372	Steven
10378	Steven
10397	Steven
